

Division

Target Number Game

Materials: Target Number board, dice, paper and pencil

1. Choose your target number and write it in game board. (Each person can choose their own)
2. Roll the *die within a die*
3. Each player divides their target number (dividend) by either number that was rolled. (divisor)
4. If you have a remainder in your quotient (answer), mark that number of boxes off on your recording sheet. If you don't have a remainder, you make NO marks.
5. Next player rolls and the process continues
6. The first person to fill their chart wins.

****Strategy: Decide which number to use as your divisor that will give you the biggest remainder****
